

Annual Report 2018

For the year ended March 31, 2018

Tohoku Electric Power Co.,Inc. (Japan)

Tsuru no Mai Bridge

The elegant Tsuru no Mai Bridge, which spans Tsugaru Fujimi Lake, is an unforgettable sight. With its three gentle arches and Mt. Iwaki in the background, it resembles a crane in flight. It is said that if you walk across the bridge you will enjoy a long life.

The 300-meter wooden bridge, the longest triple-arch bridge in Japan, was completed on July 8, 1994. It is now a symbol of the town of Tsuruta, famous as the home of the red-crowned crane, as well as a place of international cultural exchange.

Tsuru no Mai Bridge's personality shifts with the changing seasons, and even the time of day. The spectacular scene of the bridge emerging with the dawn, and its orange and red glow at sunset, draws visitors from all over Japan and the world.
